ELSEVIER

Volume 67, Nos. 1–3, May 1997

Journal of
Materials
Processing
Technology

Contents

Special volume incorporating expanded papers from the Proceedings of the International Conference on Mechanics of Solids and Materials Engineering, Singapore, 5–7 June 1995. Guest Editor: Nee Lam Loh

Introductory editorial for special volume 1

Rate of deformation on HIPped Al-composites 2
M. Takahashi , M.J. Tan , K. Hanada , Y. Murakoshi , N.L. Loh , T. Sano

Aluminium–lithium/SiCp composites produced by mechanically milled powders 8
K. Hanada , K.A. Khor , M.J. Tan , Y. Murakoshi , H. Negishi , T. Sano

The production and evaluation of metal-matrix composite castings produced by a pressure-assisted investment casting process 13
C.S. Lim, A.J. Clegg

Effects of temperature rise on dynamic powder compaction 19
T. Sano , A. Obinata , H. Negishi , K. Suginami , H. Takeishi

A study of the hydrostatic extrusion of copper-clad aluminium tube 24
H.J. Park , K.H. Na , N.S. Cho , Y.S. Lee , S.W. Kim

Plastic zones in the extrusion of metal composites 29
R. Sliwa

Laser solidification process of photo-curable monomers 36
S. Hagihara , M. Hihara , S. Furukawa , H. Makino , T. Shimizu , T. Sano , K. Matsuno

Characteristics of photopolymeric material used in rapid prototypes: Part I. Mechanical properties in the green state 41
C.M. Cheah , A.Y.C. Nee , J.Y.H. Fuh , L. Lu , Y.S. Choo , T. Miyazawa

Characteristics of photopolymeric material used in rapid prototypes: Part II. Mechanical properties at post-cured state 46
C.M. Cheah , J.Y.H. Fuh , A.Y.C. Nee , L. Lu , Y.S. Choo , T. Miyazawa

Effect of the aspect ratio of mica crystals and crystallinity on the microhardness and machinability of mica glass-ceramics 50
D.S. Baik , K.S. No , J.S. Chun , H.Y. Cho

Surface roughness prediction in the turning of high-strength steel by factorial design of experiments 55
I.A. Choudhury, M.A. El-Baradie

Thermal cycling processes in metal-matrix composites 62
M.J. Tan , M.C. Chew , N.P. Hung , T. Sano

Sintering and mechanical properties of sol–gel derived alumina–zirconia composites 67
M. Balasubramanian , S.K. Malhotra , C.V. Gokularathnam

Optimum shape design techniques of direct roller under thermal load and rolling force in the direct rolling process of molten materials considering solid fraction 71
C.G. Kang, Y.D. Kim

Upper-bound analysis of the rotary forging of a cylindrical billet 78
S. Choi , K.H. Na , J.H. Kim

An upper-bound analysis of the closed-die forging of spur gears 83
H. Cho , J. Choi , G. Min , Y. Choi , J. Choi

Effects of the fiber content on the longitudinal tensile fracture behavior of uni-directional carbon/epoxy composites . . . 89
H.S.B. Rochardjo , J. Komotori , M. Shimizu , Y. Miyano

Effect of interfacial characteristics on the failure-mechanism mode of a SiC reinforced Al based metal-matrix composite . . . 94
M. Gupta , M.K. Surappa , S. Qin

Diffusion in mechanical alloying . . . 100
L. Lu , M.O. Lai , S. Zhang

Effect of molding parameters on compression molded sheet molding compounds parts . . . 105
K.T. Kim , J.H. Jeong , Y.T. Im

Mechanical alloying of a TiC–TiN ceramic system . . . 112
S. Zhang , S.C. Tam

Elongational strength of polyethylene melt . . . 117
A.C.-Y. Wong, V.H.K. Cheung

Metal injection molding: effects of the vinyl acetate content on binder behavior . . . 120
K.C. Tam , S.P. Yap , M.L. Foong , N.H. Loh

Processing and properties of a fibre reinforced liquid crystalline polymer . . . 126
X. Hu, S.C. Tan, I.R. Chaudhary

Hot isostatic pressing of cast SiCp-reinforced aluminium-based composites . . . 131
Z.M. Xu, N.L. Loh, W. Zhou

Colloidal processing of sub-micron alumina powder compacts . . . 137
L.C. Lim, P.M. Wong, J. Ma

Cold–hot isostatic pressing of Mar M200 superalloy powders . . . 143
L.S. Ng, N.L. Loh, F.Y.C. Boey

Indirect monitoring of machinability in carbon steels by measurement of cutting forces . . . 150
K.N. Strafford, J. Audy

Effect of cutting fluid on the machinability of metal matrix composites . . . 157
N.P. Hung, S.H. Yeo, B.E. Oon

Sintering kinetics of Mo-free cermets . . . 162
S. Zhang , G.Q. Lu

Finite-element analysis and X-ray measurement of the residual stresses of ceramic/metal joints . . . 167
S.B. Lee, J.H. Kim

Identification of memory kernels for materials with memory . . . 173
F. Unger, L.v. Wolfersdorf

Development of a penalty method contact algorithm and its application to a sheet forming problem . . . 177
T. Shimizu, T. Sano

Effects of a time-dependent interfacial layer on the thermo-mechanical response of polymer matrix composites . . . 183
S. Yi

A formulation for determining the single-pass mechanics of the continuous four-roll thin plate bending process . . . 189
M. Hua , I.M. Cole , K. Baines , K.P. Rao

Modelling of void crushing for large-ingot hot forging . . . 195
C.Y. Park, D.Y. Yang

Study of sheet metal failure mechanisms based on stress-state conditions . . . 201
W.M. Sing, K.P. Rao

Three-dimensional finite-element analysis of the compression molding of sheet molding compound . . . 207
S.Y. Kim, Y.T. Im

Author Index of Volume 67 . . . 215

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.
